

Content Management Lifestyle: There is No Delete Button (1:10-1:50pm ET)

AND

Toward Cybersecurity Leadership Framework (2:00-2:40EST)

Join us for the CAE Forum!

CAE Forum is a live, real-time, online, academic forum where members of the CAE community give non-technical presentations on topics of value to the CAE community. CAE Forum is about sharing your ideas, knowledge, and expertise to empower and strengthen our community. Presentations are normally held on the third Wednesday of each month during the Fall and Spring semesters.

Topic: Bringing Methodology Back to Cyber Security

Date: 13 June 2018

Time: 1:10-1:50pm ET

Location: <https://caecommunity.zoom.us/my/caeforum> (Login as "Guest" & enter your name. No password needed.)

Audience: All levels

Presenter(s): Stacey Lee-Curbean, University of Maryland University College

Description: Technological advancements have made it easy for users to provide all types of information that is stored and retrievable on demand; however, this ease can make us susceptible to the malicious intent of others. Whether you create an account to access content from a website, make an online purchase, or provide social media comments, once submitted this information can't be recalled. In many cases, the information that we provide is stored redundantly. So, is there such a thing as a total "Delete"? Though we can't erase our digital footprint, it is our responsibility to learn how others capture, manage, store, deliver, and preserve the information that we provide. We must become champions of our cyberspace destiny; not just yours, but for the generations to come.

Topic: Toward Cybersecurity Leadership Framework

Date: 13 June 2018

Time: 2:00-2:40pm EST

Location: <https://caecommunity.zoom.us/my/caeforum> (Login as “Guest” & enter your name. No password needed.)

Audience: All levels

Presenter(s): Dr. Simon Cleveland from City University of Seattle

Description: Cybersecurity is a critical issue for organization and executive leadership faces challenges that their predecessors escaped. If executive leadership and boards of directors are charged with setting policy and regulations regarding the company’s cybersecurity efforts, a greater understanding of the field and the threats needs to be communicated before leadership can be expected to make critical decisions in the face of cyberattacks. This presentation addresses what type of leadership should be applied in the various cybersecurity preparation and response stages, as proposed by the NIST Cybersecurity Framework, in order to educate cybersecurity leaders in developing a prescriptive approach to addressing future cyberattacks. A novel cybersecurity leadership framework is proposed, which recommends leadership styles against the functional areas of the cybersecurity preparation and response stages.

A recording of the live presentation will be available within 48 hours of the presentation at:
