

Fall at Chico State

Chico State is known for first-rate academics, an affordable education that changes lives, active learning driven by faculty who urge you to make a difference, and a vibrant campus and college town. We are a Hispanic-Serving Institution that welcomes all.

Our Computer Science department, the first of its kind in the California State University system, has been graduating students for over 50 years. With small classes, friendly instructors, and a hands-on approach to teaching, we ensure students develop the problem-solving skills necessary to thrive after graduation. The Computer Science Department is accredited by the Computer Accreditation Commission of ABET.

We offer a range of programs to meet diverse student interests and career goals, including a Bachelor of Science in Computer Information Systems, a Bachelor

of Science in Computer Science, a Master of Science in Computer Science, and an online Master of Science in Computer Science. Additionally, we provide a Computer Science minor, a Cybersecurity minor, and a Data Science certificate.
