Quotes from Competitors

“What is it about a CTF that you like? Well, honestly, I like to see myself at the top of the scoreboard. Is it something like a sport to you?”

Yeah, I like the competitive environment. Especially when my name is at the top of the scoreboard.

Quotes from Competitor: Monica

ny advantage in being a girl on a team? Well, I mean coming from a girl I think we're smarter. Aside from that, I think actually females understand the human aspect better. And, especially when you are at the highest competition fighting against the red team and you have to understand the human part of it. When I am looking at the computer screen I know who is looking at the other side of the screen, it's not just a computer, it's another person, what they're thinking definitely matters, how I should secure the machine."
