# STONY BROOK UNIVERSITY

Stony Brook University CS Department

**Stony Brook University (SBU)**, a flagship institution of the State University of New York (SUNY) system, is renowned for its robust research programs and commitment to academic excellence. Located on Long Island, this top public university offers a diverse campus life and an innovative environment filled with opportunities for its students and community. As a hub for discovery, SBU is continually making significant contributions to science, technology, medicine, and the humanities.

The Department of Computer Science (CS) at SBU is committed to advancing the security and privacy of computing platforms, a central focus for several CS faculty members and researchers. Our mission is to (1) lead in research, education, and developing innovative security technologies, (2) foster interdisciplinary research through leveraging public and private partnerships that address the complex challenges of our digital age, and (3) provide a comprehensive security education program that extends beyond SBU, resulting in a stronger workforce attuned to the needs of its users while simultaneously ready to push the envelope in research and innovation.

Stony Brook's Department of Computer Science is experiencing significant growth, with research expenditures growing by 25% and the number of faculty growing by 15% in the last three years. The CS department faculty includes 25 NSF CAREER award winners and 10 fellow/distinguished members of professional societies. It is ranked #13 in computer security and #23 overall, according to CSrankings.org.

As the largest producer of undergraduate and doctoral degrees in computer science in New York, we are committed to expanding computing education and have made great strides in outreach to underrepresented students. With a strong trajectory of growth and excellence, the Department of Computer Science continues to push the boundaries of research and education.
